

FIVE ASPECTS OF EDUCATION

1. INFORMATION: Often we think information is education but it is only one aspect of education.
2. CONCEPT: Concepts are the basis of all research you need to conceive in order to create.
3. ATTITUDE: An integral aspect of education is cultivating the right attitude at the right time and place determinants your actions and behavior.
4. IMAGINATION: Imagination is essential for creativity, for the arts. But if you get stuck in imagination you can become psychotic.
5. FREEDOM: Freedom is your very nature, only with freedom do joy, generosity and human values blossom stifling. Concepts become burden, information is of no value and imagination becomes stagnant.
